Tigercat 760B Mulcher

INTRODUCTION

An Operator's Manual, Service Manual and a Parts Catalog are made available by Tigercat to assist the dealer, customer, and operator in becoming familiar with the features of the 760B Mulcher.

SERIAL NUMBERS:

760B 7600501–7601000

The 760B Mulcher is a mechanical mulcher intended for use in forest mastication, vegetation management and land reclamation operations.

An optional multi-function hydraulic system and quick attach boom adapter allows the machine to be quickly and easily switched from a mulcher to a feller buncher for increased versatility.

When equipped with a felling head the 760B can be used for harvesting trees, selective felling, thinning and final felling applications in plantations and natural stands.

The Operator's Manual will assist the operator with the techniques of proper and safe operation of the 760B Mulcher. There is also important information regarding the safe operation of the attachment (if equipped). The Service Manual contains safety and servicing procedures and a preventive maintenance schedule to ensure optimum machine performance.

Section 1 in both the Operator's Manual and the Service Manual contains safety information that must be followed. Throughout the rest of the manuals, DANGER, WARNING and CAUTION notices are displayed where necessary, drawing attention to possible hazards when performing certain procedures.

Only trained personnel are allowed to operate or work on the machine.

Read and understand the information contained in this manual, and all attachment and accessory manuals associated with this machine, prior to starting, operating, or performing maintenance on the machine for the first time.

Replace the Operator's Manual immediately if lost, damaged, or unreadable.

Follow all jobsite organizational rules when operating the machine in coordination with other machines, vehicles, and people on the jobsite.

This manual is an important part of the machine and should remain with the machine if sold.
