The M726G Mulcher is a mechanical mulcher intended for use in forest mastication, vegetation management and land reclamation operations.

An optional multi-function hydraulic system and quick attach boom adapter allows the machine to be quickly and easily switched from a mulcher to a feller buncher for increased versatility.

When equipped with a felling head the M726G can be used for harvesting trees, selective felling, thinning and final felling applications in plantations and natural stands.

The Operator's manual will assist the operator with the techniques of proper and safe operation of the M726G Mulcher. There is also important information regarding the safe operation of the attachment (if equipped). The Service manual contains safety and servicing procedures and a preventive maintenance schedule to ensure optimum machine performance.

Section 1 in both the Operator's manual and the Service manual contains safety information that must be followed. As well, throughout the rest of the manuals, DANGER, WARNING and CAUTION notices are displayed where necessary, drawing attention to possible hazards when performing certain procedures.

Only trained personnel are allowed to operate or work on the machine.
