Safety guidelines / Accident prevention

- Please read and observe the information given in this Operation Manual. This will enable you to avoid accidents, preserve the manufacturer's warranty and maintain the engine in peak operating condition.
- This engine has been built exclusively for the application specified in the scope of supply, as described by the equipment manufacturer and is to be used only for the intended purpose. Any use exceeding that scope is considered to be contrary to the intended purpose. The manufacturer will not assume responsibility for any damage resulting therefrom. The risks involved are to be borne solely by the user.
- Use in accordance with the intended purpose also implies compliance with the conditions laid down by the manufacturer for operation, maintenance and servicing. The engine should only be operated by personnel trained in its use and the hazards involved.
- The relevant accident prevention guidelines and other generally accepted safety and industrial hygiene regulations must be observed.
- When the engine is running, there is a risk of injury through:
 - turning/hot components
 - engines with positive ignition
 - ignition systems (high electrical voltage)You must avoid contact at all times!

- Unauthorized engine modifications will void any liability of the manufacturer for resulting damage. Manipulations of the engine, and its accessories, may also lead to legislation on product liability. The manufacturer is not liable for any damage resulting from such work.
- Do not change, cover or obstruct the air intake area to the engine. The manufacturer is not liable for any damage resulting from such work.
- When carrying out maintenance or repairs on the engine, the use of original parts is particularly important for safe operation. Non-compliance with these instructions voids the warranty!
- Maintenance and repairs should only be carried out when the engine is switched off and the ignition system has been removed. Accident prevention measures for electrical systems (e.g. 0104/-0105 Electrical safety) must be observed. When cleaning with high-pressure water, components are to be protected.

Engine Serial
Number:

--	--	--	--	--	--	--	--

Please enter the engine serial number here. This number should be quoted when inquiring about Customer Service, Repairs or Spare Parts (see Section 2.1).

Technical modifications required to improve our engines are reserved with regard to specification data and other technical information contained in this Operation Manual. No parts of this Manual may be reproduced in any form or by any means without our written approval.
